alumnus.

Website playbook & Higgsfield prompt pack

How the new Shopify theme compares with heypocket.com, the offers and conversion tactics Pocket and its competitors use (and where each one now lives on your site), how to connect the store more closely with Shopify, and a prompt for every image and video slot.

Part 1 · Pocket vs Alumnus
Section-by-section comparison and what changed

Part 2 · Offers & conversion
Pocket, Plaud, Bee, Omi teardown and your offer stack

Part 3 · Shopify integration
Setup order, native features and apps

Part 4 · Higgsfield prompt pack
30+ assets keyed to the theme's labelled placeholders

Prepared October 15, 2026

Theme: alumnus-theme (Shopify Online Store 2.0)

START HERE

What you're getting

Read this page first. Everything else is reference.

1. **A complete Shopify theme** in the same folder layout as your screenshot (assets, config, layout, locales, sections, snippets, templates) plus a ready-to-upload zip. It passes Shopify's Theme Check with 0 errors and 0 warnings.
2. **Every image and video slot shows a labelled placeholder** (for example `IMG-01`) until you upload the real file. Each label matches a prompt in Part 4, so you always know what goes where.
3. **Conversion features are built in:** bundle tiers, real countdowns, email popup with instant code, sticky buy bar, slide-out cart with add-on and discount field, comparison table, guarantee strip, FAQ schema, and a landing page template for ads.
4. **All copy is editable** in the theme editor. Anything in [brackets] is a fact only you or your supplier can confirm. The checklist at the end lists every one.

Fastest path to launch

1. Create the product in Shopify (Part 3, step 1) and upload the theme zip (Online Store › Themes › Add theme › Upload zip file).
2. In Customize › Theme settings › Product and offer, pick **Your Alumnus product** and set the real sale end date.
3. Create the two bundle discounts and the welcome code (Part 3, steps 3–4).
4. Generate the **P1** assets first (hero, macro, app image, product packshots, popup, share image, brand film), then P2 and P3.
5. Fill every [bracket] using the checklist, place a test order, then publish.

> **Three honesty rules that protect the store.** Only show real reviews, real customer counts and real logos. Use a compare-at price only if you really sold at it. Keep the "Demo footage" note on AI-made clips. The theme is built to make these the easy defaults; Part 2 explains why.

Part 1 Pocket vs Alumnus: comparison and what changed

Part 2 Offers and conversion research, and your recommended offer stack

Part 3 Connecting the store more closely with Shopify

Part 4 Higgsfield production guide and prompt pack

Part 5 Launch checklist

PART 1

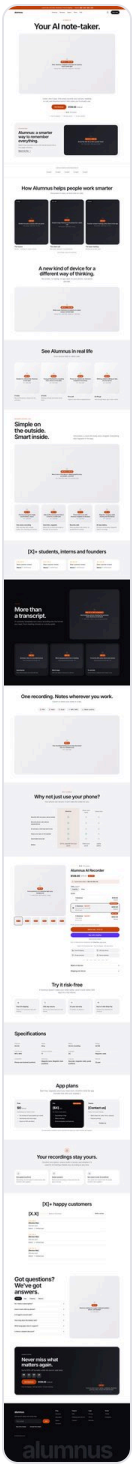

Pocket vs Alumnus

Your homepage already follows Pocket's section order. What made Pocket feel better was the execution: a white canvas, big rounded product media, video everywhere, and an offer engine around the buy box.

HEYPOCKET.COM

NEW ALUMNUS

Same storyline, top to bottom

Both pages follow the classic hardware storyline: **promise** (hero) → **proof** (film, logos, real people) → **product** (design, app, formats) → **offer** (buy box, plans) → **reassurance** (privacy, reviews, FAQ).

The new theme keeps that order and adds three conversion sections Pocket handles on separate pages or not at all: a **comparison table**, a **risk-free guarantee strip** and a **closing offer** with countdown.

Left: your Pocket screenshot (the dark lower part is Pocket's discount popup covering the page). Right: the new Alumnus homepage rendered from the theme files, with labelled placeholders where the Higgsfield assets go.

> **What I deliberately did not copy:** Pocket's exact headlines, logos and inflated "list price". Layout and conversion patterns are fair game; cloning copy or trade dress makes Alumnus look like a knock-off and invites trouble. Your accent stays orange; a Pocket-style blue is one setting away.

Section by section

SECTION	HEYPOCKET.COM	YOUR PDF HOMEPAGE	NEW ALUMNUS THEME
Announcement bar	Blue bar with a limited-time offer	Orange bar, placeholder offer	Rotating messages + a live countdown to your real sale end date (hides itself when the sale ends)
Header	Logo, anchor links, buy button	Same	Sticky, frosted header, anchor links, black **Buy now** pill, cart count, Shopify account sign-in, mobile slide-out menu
Hero	Small label, big headline, large product image, CTA with price and stars	Similar, supplier photo with Chinese marketing text	Same structure on a white canvas, large rounded media frame (IMG-01 / IMG-01M), live price + compare-at, star rating, trust line
Intro film	"Introducing Pocket" card with video	Card with video placeholder	Grey card, play button, Shopify-hosted video or YouTube/Vimeo (VID-01 + IMG-02)
Logo bar	"Trusted by people at" + company logos	[Logo] placeholders	Greyscale logo bar; doubles as an "As seen in" press bar
Video stories	3 vertical customer videos with names	3 placeholders	Swipeable carousel of muted autoplay clips with sound toggle (VID-02 to VID-04) and an honest "Demo footage" note until real customer clips exist
Statement + wide image	Big statement and wide brand image	Dark section	Light, airy wide image (IMG-03 / IMG-03M), like Pocket
Real-life gallery	Row of lifestyle photos	4 photo placeholders	Swipeable 4:5 photo cards (IMG-04 to IMG-07)
Feature bento	"Simple on the outside. Genius inside." with product images	Text cards only	Large macro image or loop (IMG-08 / VID-05) + 4 image feature cards (IMG-09 to IMG-12)
Review cards	"400,000+ Creators, Founders and Thinkers" with photos	4 text placeholders	Swipeable review cards with stars; optional real customer photos
App section	"AI that's more than smart" phone + feature cards	Dark section, text cards	Dark section with phone image (IMG-13) + 3 real screenshot cards (APP-01 to APP-03)
Integrations	"Takes one conversation and updates all your apps"	Format pills	Format pills + export visual (IMG-17)
New: comparison	Separate "Pocket vs Plaud" pages	—	"Why not just use your phone?" table on the page
Buy box	Gallery + options + bundles + popup	Gallery, color, 2 bundle options	Gallery (IMG-18 to IMG-24), color swatches, 3 bundle tiers with badges and per-unit prices, countdown, Shop Pay express, Pay-in-4 message, trust badges, payment icons, sticky buy bar
New: risk reversal	Free shipping in offer copy	Trust line only	"Try it risk-free" strip: shipping, returns, warranty, pay in 4

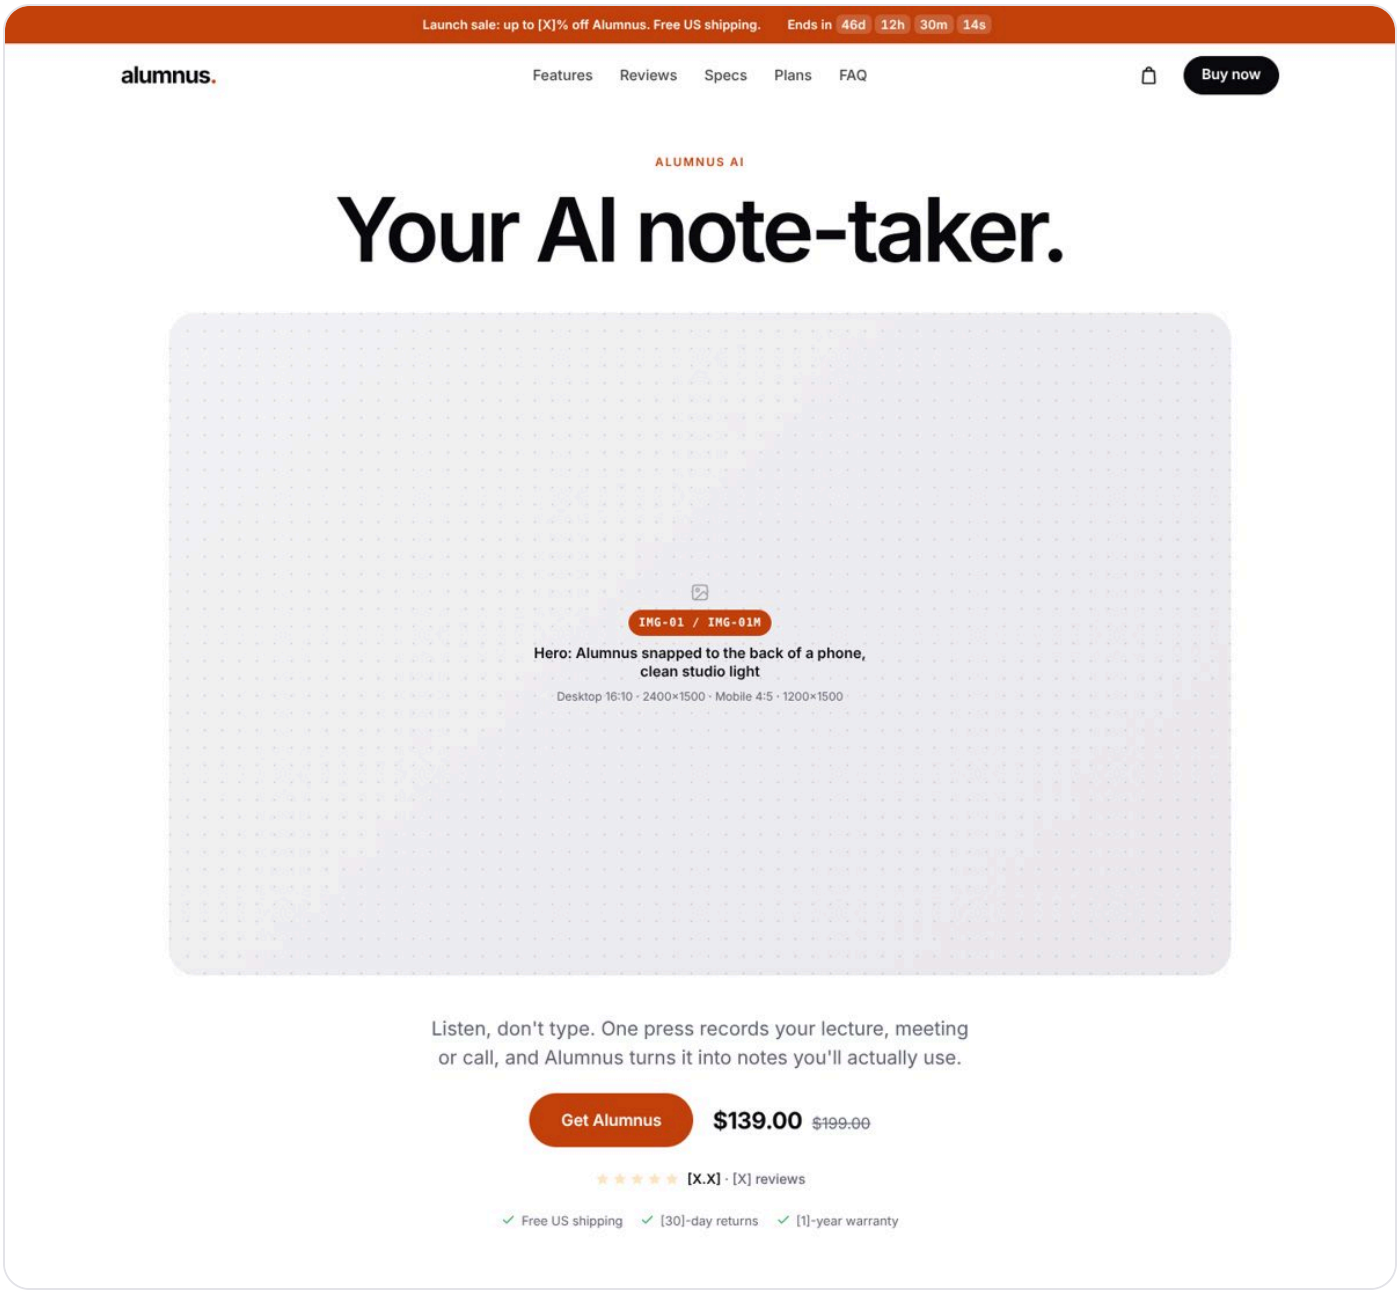

SECTION	HEYPOCKET.COM	YOUR PDF HOMEPAGE	NEW ALUMNUS THEME
Specs	Spec grid	Spec grid	Spec grid that can pull values from product metafields
Plans	"Unlock your best with Pocket Pro" 3 columns	Free / Pro / Teams	Same 3 plans, highlighted Pro, "no subscription needed" note
Privacy	"Your data stays yours always"	Lock + text	Lock icon + 3 proof points (encrypted, delete anytime, not used for training)
Reviews	"400,000+ Happy Customers" review app widget	Manual placeholders	Live average + count from your reviews app (Judge.me etc.) and an app block slot for the full widget
FAQ	Tabs + accordion + product image	Same	Same, plus FAQ rich-result schema for Google (IMG-25)
New: closing offer	—	—	Dark banner with countdown, price and CTA (IMG-26)
Popup	"Claim your 45% off today" email popup	—	Timed / scroll / exit-intent popup with instant code, copy button, auto-apply link, teaser tab (IMG-27)
Cart	Standard Shopify cart	—	Slide-out cart with savings lines, discount code field, add-on offer, Pay-in-4, express checkout
Footer	Links, app badges, big logo	Links, newsletter, badges	Same, with Shopify-native email signup and big wordmark

Design system

	POCKET	YOUR PDF HOMEPAGE	NEW THEME
Canvas	Pure white, light grey cards	Warm cream + dark sections	White + #F4F4F6 cards, one dark app section
Accent	Bright blue	Burnt orange #C2410C	Kept your orange (one setting to switch, e.g. #2F5BFF for a Pocket-style blue)
Type	Clean grotesk, semibold, tight tracking	Very heavy display grotesk	Inter Semibold headlines, tight tracking, Inter body (from Shopify's font library)
Shapes	Large rounded corners, pill buttons	Rounded cards	28 px card radius, pill buttons, soft shadows
Imagery	Studio product shots + lifestyle + video everywhere	Supplier photos	30 labelled slots, one consistent Higgsfield art direction
Motion	Subtle fades, carousels	—	Fade-up on scroll, swipe carousels with arrows, autoplay loops that pause off-screen

What the new theme looks like

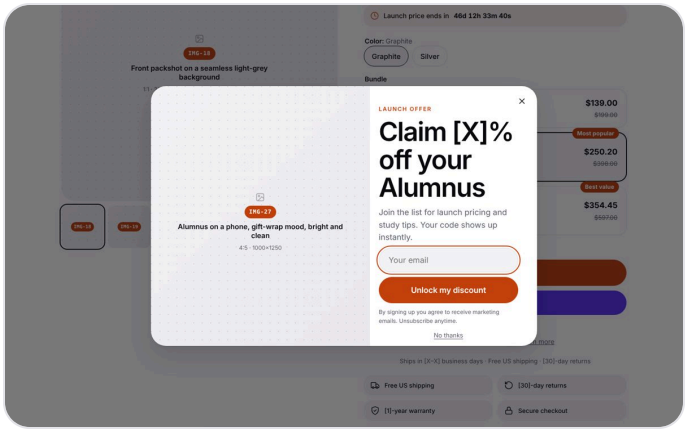

Rendered from the actual theme files with a sample product ($139, compare-at $199) and empty media slots.

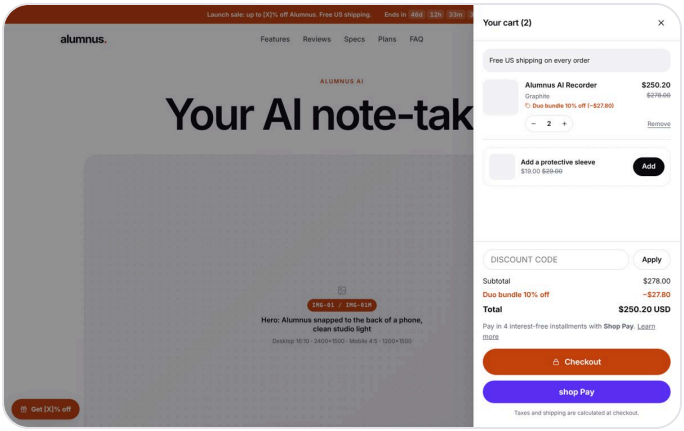

Hero: announcement bar with live countdown, sticky header, labelled hero slot (IMG-01), price, rating and trust line.

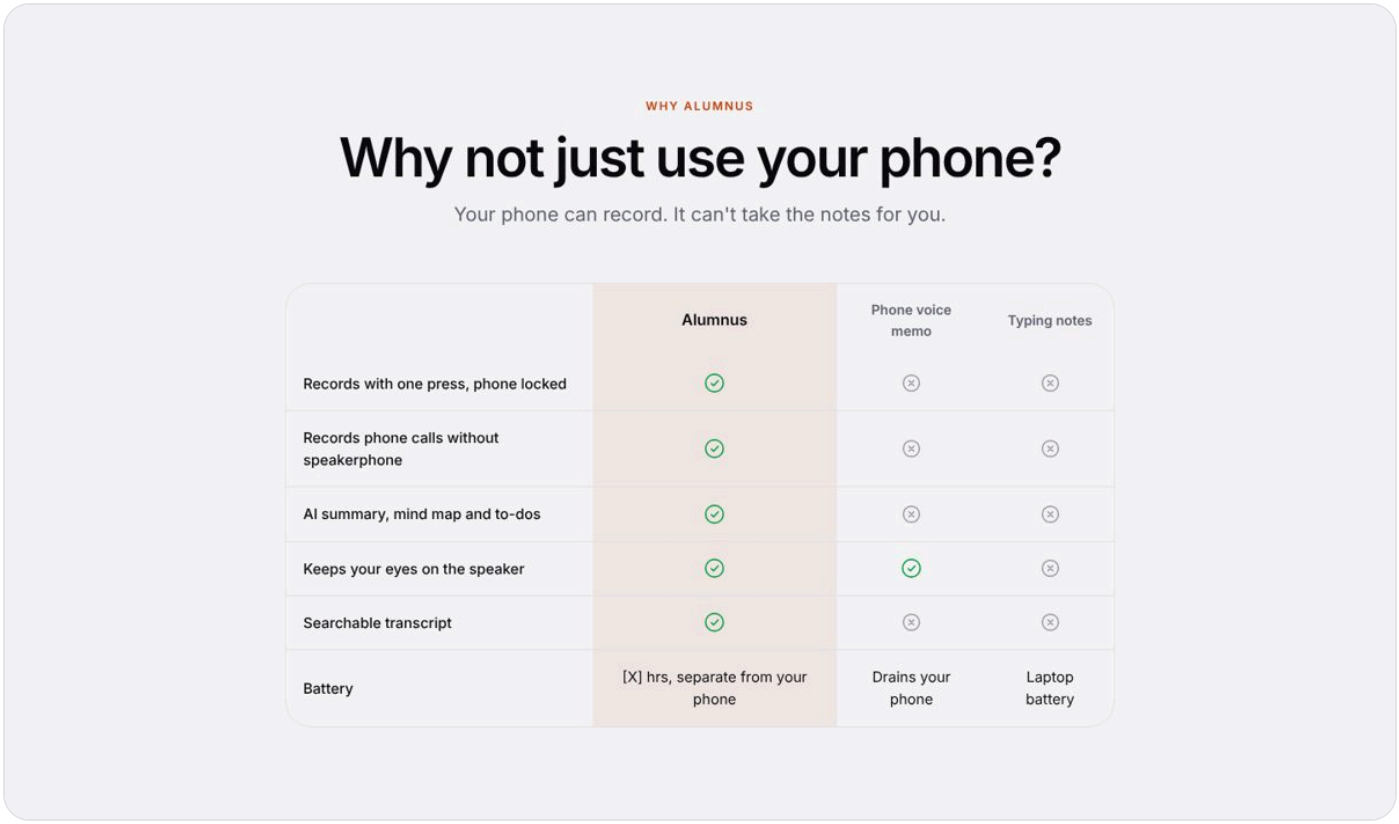

Buy box: color swatches, bundle tiers with badges and per-unit prices, countdown, Shop Pay express, Pay in 4, trust badges.

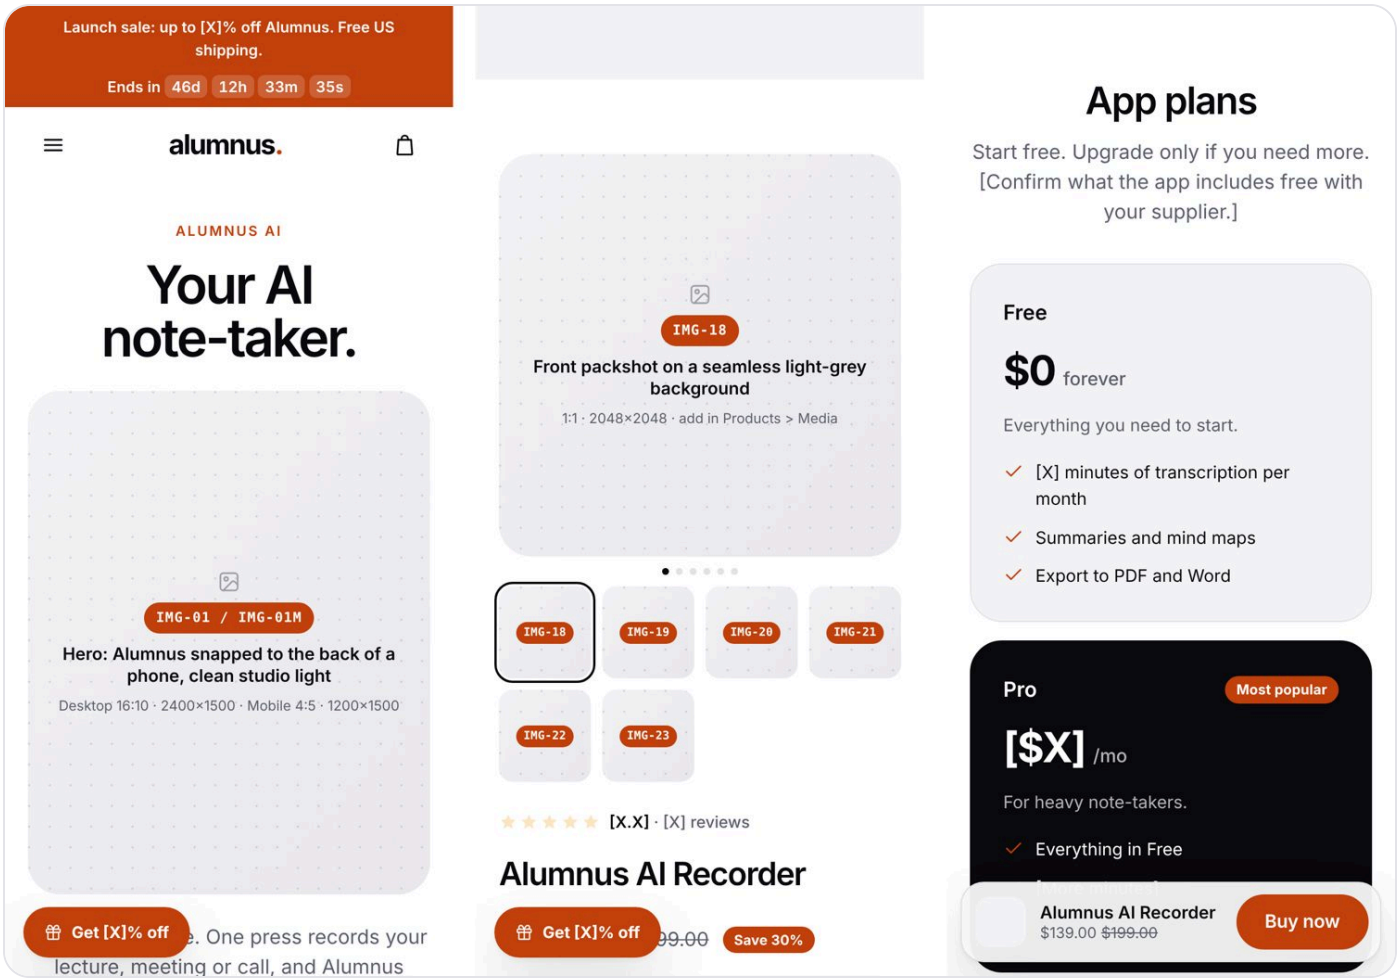

Email popup (Pocket's "Claim your 45% off" pattern) with instant code and teaser tab.

Slide-out cart: bundle savings line, add-on offer, discount code field, Pay in 4, express checkout.

New comparison section ("Why not just use your phone?").

Mobile: hero, buy box with thumbnail placeholders, sticky buy bar.

PART 2

Offers & conversion research

What Pocket and its competitors actually do, what works, and exactly where each tactic now lives in your theme.

Pocket's offer engine

TACTIC	WHAT POCKET DOES	WHY IT WORKS / THE CATCH
Price anchor	List $199, sells around $129–$139; "Up to 45% off" [1][2]	Big headline saving, but buyers notice a permanent "sale". Use a compare-at price only if you really sold at it.
Quantity tiers	Solo 35% off, Double Pack 40%, Team Pack 45%; reported $139 / $238 / $327 (about $139 / $119 / $109 each) [2][3]	Moves people to 2–3 units and raises order value. Built into the new buy box.
No subscription + free tier	"No subscription required", unlimited free transcription; Pro optional, about $16.59/mo yearly or about $20 monthly [1][4]	Removes the #1 objection for AI gadgets. Copy this message if your app really works without a plan.
Pro add-on	"12-month access to Pocket Pro, 25% off" sold as a store product [5]	Recurring revenue at checkout. Only possible if your supplier gives you activation codes.
Email popup	"Claim your 45% off today" (in your screenshot); one reviewer says the 45% email code didn't apply at checkout [6]	Big list growth. Lesson: test that the code really works.
Quiz funnel	"Take the Pocket Quiz & Get Up to 45% Off" [7]	Personalises the pitch and captures email. Phase 2 for Alumnus.
Comparison pages	"Pocket vs Plaud Note": range, one press, languages, free minutes [8]	Catches people already comparing. On your page as a table; keep claims true.
Persona / advertorial pages	Separate pages for founders and C-suite, advertorial-style pages, several homepage variants [7]	Ads land on a page written for that audience. Use the new Landing page template.
Affiliate program	Public affiliate page [7]	Creators sell for you. Use Shopify Collabs.
Social proof	"160,000+" on one page, "400,000+" in your screenshot; logo bar; video testimonials [9]	Strong, but use only real numbers.

Read the numbers with care. Pocket's prices and percentages differ across its own pages and third-party sites, and change often. Treat them as patterns, not exact benchmarks, and check heypocket.com before quoting them anywhere.

What competitors do

BRAND	OFFERS AND CONVERSION MOVES	LESSON FOR ALUMNUS
Plaud	"Trusted by 1,000,000+ users" (US page); 10% education discount for students, educators and healthcare, verified via ID.me / Student Beans / GoCertify; device + AI plan bundles (e.g. Note + Unlimited annual $367 vs $399); seasonal sales up to 20%; press quotes [10][11][12]	Student offer fits Alumnus perfectly; device + plan bundles if you get codes
Bee (Amazon)	$49.99 hardware, optional subscription [13]	Low entry price; be clear why Alumnus costs more
Omi	About $89, no required subscription [13]	"No subscription" is now table stakes
Limitless	Bought by Meta (Dec 2025); pendant no longer sold to new buyers [13]	Buyers fear orphaned devices: stress export, warranty and support

Benchmarks to judge your results

METRIC	TYPICAL SHOPIFY STORE	TOP 20%
Conversion rate	1.4%	3.2%+
Add-to-cart rate	4.6%	7.5%+
Checkout completion	45%	59%+
Mobile vs desktop conversion	1.2% vs 1.9%	

Littledata figures as quoted in 2026 roundups [24]. Vendor claims put sticky add-to-cart bars at a 10–20% mobile lift; I couldn't verify those against primary data, so test rather than assume.

Every tactic, and where it lives now

TACTIC	SEEN AT	WHERE IN THE THEME	WHAT YOU SET UP
Announcement bar + real countdown	Pocket, Plaud	Header › Announcement bar; countdown date in Theme settings › Product and offer	Set a real sale end date
Price, compare-at and stars beside every CTA	Pocket	Hero, Buy box, Closing offer, Sticky bar	Set price/compare-at on the product
Quantity tiers with badges and per-unit price	Pocket	Buy box › Bundle tier blocks	Create 2 automatic discounts (2+ and 3+ units)
Free extra on bigger bundles	DTC standard	Buy box › tier "Free extra" text	Buy X get Y automatic discount, or ship it free
Shop Pay express + Pay in 4	Shopify	Buy box, cart	Turn on Shop Pay and Installments

TACTIC	SEEN AT	WHERE IN THE THEME	WHAT YOU SET UP
Sticky buy bar	DTC standard	Buy box › Sticky bar	—
Email popup with instant code	Pocket	Discount popup (timer, scroll, exit intent, teaser)	Create WELCOME code; Shopify Messaging welcome flow
Slide-out cart with savings, code field and add-on	DTC standard	Cart drawer; Theme settings › Cart	Pick an add-on product
Logos, video stories, review cards, live stars	Pocket	Logo bar, Video carousel, Review cards, Reviews	Install a reviews app (Judge.me)
Comparison table	Pocket (vs Plaud pages)	Comparison table section	Keep every claim true
Risk reversal	Plaud, DTC standard	Guarantee section + buy box trust badges	Match your refund policy
Subscription transparency	Pocket	Plans section + FAQ	Confirm app limits with supplier
Privacy reassurance	Pocket	Privacy section	Confirm data handling with supplier
FAQ objection handling + rich results	Pocket	FAQ (with FAQPage schema)	—
Second CTA at the end	Pocket	Closing offer section	—
Persona / ad landing pages	Pocket	Page template "landing"	Create a page, choose template "landing"
Student discount	Plaud	Announcement message, FAQ question, buy box text block	Student verification app
Creator / affiliate program	Pocket	Footer link + Collabs page	Install Shopify Collabs
Honest low-stock message	DTC standard	Buy box › "Only X left" threshold	Track inventory
Quiz funnel	Pocket	Not built yet (phase 2)	Quiz app or a landing page

Recommended offer stack for Alumnus

Pocket owns founders and executives; Plaud owns professionals. **Alumnus can own students and early-career people**: the name, "In class" use case, study tips list and a student discount all point there. Build the offer around that.

LEVER	RECOMMENDATION	NOTE
Everyday price	Your real price (competitors sit around $129–$189)	Use compare-at only if you genuinely sold at that price for a meaningful period
Bundles	Solo 0% · Duo 10% · Study group (3) 15% (theme defaults)	Raise only if your margin allows; Pocket's 35–45% is measured from a high list price
Welcome offer	10% off the first order via the popup	Don't let it stack with bundle tiers
Student offer	10% with verification	Same as Plaud; your brand name fits students
Risk reversal	Free US shipping, 30-day returns, 1-year warranty	Only promise what your supplier and margin can back
Holiday	BFCM: Thu Nov 26 to Mon Nov 30, 2026; gift message "one for you, one to gift" through December	Set the countdown to the real end date
Add-on	Sleeve, spare cable or Pro plan card in the cart (about $15–$25)	Lifts order value with one tap

Bundle math (example numbers)

With a $139 price and the theme's default tiers: Duo 2 × $139 × 0.90 = **$250.20** ($125.10 each); Study group 3 × $139 × 0.85 = **$354.45** ($118.15 each). If your landed cost per unit (product + shipping + fees) were $45, the Duo would keep $160.20 of margin against $94 for a single unit. Swap in your real landed cost before raising the percentages.

Guardrails (read before launch)

TOPIC	WHAT TO DO
Fake reviews and testimonials	The FTC's rule (16 CFR Part 465) bans reviews and testimonials that claim to be from people who don't exist or who didn't use the product, including AI-generated ones, with civil penalties for knowing violations [14]. So: AI actors are fine for *demo* footage, never as "customers". The video carousel ships with a "Demo footage" note; review sections are for real reviews only.
Sale prices	A compare-at ("was") price must be a real former price (FTC Guides Against Deceptive Pricing). Bundle savings are always truthful because they are measured against your own single-unit price.
Urgency	Countdowns use your real sale end date and disappear when it passes. Low-stock messages use real inventory.
Shipping times	State realistic shipping windows and email customers about delays (FTC Mail, Internet or Telephone Order Rule).
Recording consent	Some US states require everyone on a call to consent. The FAQ says this; keep it.
AI ads	TikTok requires a label on ads with realistic AI-generated people, voices or scenes (reported live from July 2026) [15]. Label AI ads and keep them away from real private individuals.
Email and SMS	Use the consent checkbox wording in the popup; SMS needs express written consent (TCPA).

This is practical guidance, not legal advice. When in doubt, ask a lawyer.

PART 3

Connecting closer with Shopify

The theme uses Shopify's native features wherever possible, so apps and admin settings plug in instead of fighting the design.

Setup in this order

#	STEP	HOW
1	Create the product	Products › Add: "Alumnus AI Recorder", option **Color** (Graphite + any real second color), price, compare-at (only if genuine), SKU, weight, inventory tracking. Upload IMG-18 to IMG-24 and VID-06 as media; assign IMG-24 to its color.
2	Connect the theme	Online Store › Themes › Add theme › Upload zip. Then Customize › Theme settings › Product and offer › **Your Alumnus product** (one setting feeds hero, buy box, sticky bar, closing offer and reviews).
3	Bundle discounts	Discounts › Create › Amount off products: "Duo bundle 10% off", minimum quantity 2; "Study group 15% off", minimum quantity 3. Same product, automatic. Shopify applies the best one. Match the % in the Buy box tiers. Their titles show in the cart as savings lines.
4	Welcome code	Discounts › Create code **WELCOME10** (or your %), one use per customer, and decide whether it combines with the bundle discounts (recommended: no).
5	Payments	Settings › Payments: Shop Pay, Shop Pay Installments (Pay in 4 on orders of $50–$3,000), Apple Pay, Google Pay. The theme already shows the Installments message.
6	Email and SMS	Shopify Messaging (formerly Shopify Email): welcome series with the code, abandoned checkout, abandoned cart, browse abandonment, post-purchase review request, win-back. 10,000 free emails a month on paid plans; abandoned checkout emails don't count.
7	Reviews	Install Judge.me (free plan available) or similar. It writes Shopify's standard rating fields, so stars and counts appear in the hero, buy box and Reviews section automatically. Add its widget as an app block in the Reviews section.
8	Customer accounts	Settings › Customer accounts: use the new customer accounts. The header already includes Shopify's sign-in component.
9	Policies and contact	Settings › Policies: refund (30 days), shipping (real times), privacy, terms. Create a Contact page with the "contact" template.
10	Channels	Add TikTok, Facebook & Instagram, and Google & YouTube sales channels so your catalog and pixels sync. You already post on TikTok, so TikTok is the first to set up.

> **Your store today.** The connected store ("My Store", Basic plan, USD) still lists two streetwear products. Archive them (Products › select › Archive) so they don't appear in search, collections or Google Shopping. I haven't changed anything in the store.

Native features the theme already uses

- **Online Store 2.0 JSON templates and section groups**: every section can be added, removed and reordered in the editor. Header and footer live in section groups, as Shopify requires.
- **Shopify-hosted video** settings for every video slot (upload once in Content › Files, pick it in the editor).
- **Product form + dynamic checkout** (Shop Pay express) and the **Shop Pay Installments** message [18].
- **Section Rendering API** for the cart drawer: quantities, add-ons and discount codes update without a page reload [18]; discount codes use the cart `discount` parameter Shopify added to `/cart/update.js` [19].
- **Standard review metafields** (`reviews.rating` , `reviews.rating_count`): any major reviews app makes the stars live everywhere [20].
- **Customer accounts component** in the header (Shopify's sign-in sheet with Shop, Google and email) [18].
- **Native customer forms** for the popup and footer signup: subscribers land in Customers with email consent, ready for Shopify Messaging.
- **Dynamic sources**: spec values can be connected to product metafields in the editor, so specs update from the product.
- **App blocks** in the buy box, reviews and an Apps section, so reviews, bundles or upsell apps drop in without code.
- **SEO**: product structured data, FAQ structured data, Open Graph and X cards, plus your share image (IMG-28).

Apps and services worth adding

APP / FEATURE	WHAT IT DOES	COST	USE IT FOR
Shopify Messaging	Email/SMS automations and campaigns	Free allowance	Welcome code, abandoned cart, review requests
Shopify Flow	Automations	Free on Basic and up	Tag VIPs, alert on low stock, tag students, route reviews
Shopify Collabs	Creator and affiliate program	Free install, 2.9% fee on automatic payouts	Seed devices to student creators; replace AI demos with real clips
Search & Discovery	Complementary products	Free	Pick the cart add-on and recommendations
Shopify Bundles	Fixed bundles	Free	e.g. Alumnus + sleeve as one product (optional)
Shopify Inbox	Chat	Free	Answer pre-sale questions
Judge.me	Reviews with photos/videos	Free plan available	Live stars + UGC for the review cards
Student discount app	Verified student pricing	Varies (e.g. Easy Student Discounts, StudyPerks)	Match Plaud's education offer
Shop app / Shop Campaigns	Shop app audience	Pay per sale (if eligible)	Follow on Shop button is in the footer settings

Plan availability per Shopify's Flow page and Collabs listing [22][23]; Messaging allowance per 2026 guides [21]. Confirm in your admin, since plans change.

PART 4

Higgsfield prompt pack

One art direction, product accuracy first. Every ID matches a labelled placeholder in the theme.

Workflow

1. **Collect references.** Get 3–5 clean photos of the real device (front, back, edge, on a phone) and the cable. Your supplier photos work if you crop out their text.
2. **Make stills first.** For product-only shots use **Nano Banana Pro** with your reference photos attached; it is the best at keeping exact geometry and handling edits. For scenes with people use **Soul 2.0** (photoreal, editorial), then run a Nano Banana Pro edit with the references to make the device exact [16].
3. **Animate approved stills.** Use image-to-video (**Kling 3.0** or **Seedance 2.0**; Veo 3.1 when you need sound). Use one camera move per clip and keep clips to 5–10 seconds [17].
4. **Check every frame** against the references: groove count and spacing, the black strip layout, no logos, hands and fingers.
5. **Export and name files** as listed, then upload: theme slots in the editor, product images in Products › Media.

Copy-ready prompts. The file `alumnus/docs/Higgsfield-Prompts-Copy-Ready.txt` has every prompt below with the device description and house style already filled in, so you can paste straight into Higgsfield.

Model names change fast. Higgsfield adds models monthly. If a newer version of the same model is in the picker (Nano Banana, Soul, Kling, Seedance), use the newest. The prompts work across them.

Your device, described

Paste this wherever a prompt says **[DEVICE]**. It matches your supplier photos; correct anything that differs on your real unit.

[DEVICE]

the Alumnus AI voice recorder: an ultra-thin, credit-card-sized rectangle about 3 mm thick with softly rounded corners; satin graphite-blue anodized aluminum with about ten fine vertical grooves running from top to bottom; a glossy black glass strip across the top holding a small pill-shaped slide switch on the left, a tiny white sound-wave light in the middle and a small round silver dot on the right; flat magnetic back; no logos or text on the device

HOUSE STYLE (ADD TO EVERY PROMPT)

bright premium consumer-tech photography, clean white and soft cool-grey tones, large soft daylight, gentle natural shadows, realistic textures, shallow depth of field, full-frame camera look, neutral-cool color grade with clean whites, small warm orange accents only in props

[CAST]

diverse 19 to 30 year old students and young professionals, natural and candid, not posing for the camera, casual neutral clothing with no logos

NEGATIVE PROMPT (WHEN THE MODEL HAS A FIELD FOR IT)

text, letters, numbers, logos, watermarks, brand names, user interface on the device, extra buttons, extra lights, duplicate devices, warped or bent phone, bent device, extra fingers, distorted hands, plastic skin, oversaturated colors, harsh flash, cluttered background, cartoon look

Asset map

P1 = needed to launch · P2 = soon after · P3 = nice to have. "Real" = must be genuine, not generated. IMG-14 to IMG-16 are intentionally skipped: those slots take real app screenshots (APP-01 to APP-03).

Videos

VID-01 "Introducing Alumnus" brand film

P1

Where it goes	Theme editor › Home page › Intro film › Shopify-hosted video (or paste a YouTube link)	Format	16:9, 1920 × 1080, 60–90 s, MP4 (H.264). Built from 8 short clips plus voice-over and music.
File name	`alumnus-vid-01-film.mp4`	Higgsfield model	Start frames: Soul 2.0 / Nano Banana Pro. Motion: Kling 3.0 or Seedance 2.0 image-to-video, one camera move per clip. Edit in CapCut or Premiere.

SHOT	LENGTH	START FRAME (IMAGE PROMPT)	MOTION PROMPT (VIDEO)
1 One press	6 s	Close-up, top-down at 45°, a hand next to a phone lying face-down on a wooden lecture desk with **[DEVICE]** on its back.	Static camera. The index finger presses the switch on the black top strip; the small white sound-wave light softly turns on. Natural hand movement, shallow depth of field.
2 Eyes up	6 s	IMG-02 (student in a sunlit lecture hall, device on the desk).	Slow dolly in toward the student, who keeps listening and nods slightly; the lecturer stays out of focus in the background. One continuous shot.
3 Card-thin	5 s	Macro of the device standing on its edge on a pale grey surface.	Slow 90-degree orbit around the device; a soft light sweep crosses the grooves and reveals how thin it is.
4 On a call	6 s	A young professional walking down a bright office corridor, phone to ear, device visible on the back of the phone.	Smooth tracking shot moving backward in front of them as they walk and talk naturally.
5 In the meeting	6 s	Four colleagues around a light wood table; the phone with the device lies in the center among notebooks.	Slow lateral pan from left to right across the table; people talk and gesture naturally.
6 The notes	5 s	Hands holding a phone over a desk; the screen is plain white (you place a real screen recording or APP-01 on it in editing).	Static camera, the thumb scrolls gently; subtle hand movement only.
7 Study time	6 s	Evening desk, warm lamp, a student reviewing notes on a laptop, phone with the device beside the notebook.	Slow push-in toward the device on the desk.
8 End card	5 s	IMG-08 (device floating on pale grey).	Slow 180-degree orbit that ends facing front; hold the last second still for your logo and price card.

VOICE-OVER (≈150 WORDS ≈ 60 S)

Ever tried to take notes and actually listen at the same time? (beat) Meet Alumnus. One press, and it records your lecture, meeting or call. No unlocking your phone. No typing. Just listen. It's card-thin, snaps onto your phone, and captures calls without speakerphone. Then the app does the rest: a clean summary, a mind map and

> a to-do list, from 17 templates. Export to PDF, Word or email in a tap. In class. At work. On a call. On the go. Alumnus. Listen, don't type.

- Music: light, optimistic indie-electronic, 100–110 BPM, no vocals.
- Voice: record a real person (you, a friend, a student creator). If you use an AI voice, label the ad as AI-generated on TikTok and Meta.
- Add captions in the edit. Keep the last 2 seconds for your logo and the launch price.

VID-02 Use-case clip: The lecture

P2

Where it goes	Theme editor › Home page › Video carousel › Video 1	Format	9:16 vertical · 1080 × 1920 · 15–20 s · MP4
On-screen captions	Press once. → Actually listen. → Notes ready before you leave the room.	Higgsfield model	Soul 2.0 start frames (+ Nano Banana Pro device fix) → Kling 3.0 image-to-video

SHOT	START FRAME	MOTION
A 5 s	Vertical 9:16. A student sits down in a lecture hall and places a phone face-down on the desk with **[DEVICE]** on its back.	Handheld phone-camera look; the student presses the switch on the device and leans back to listen.
B 6 s	Vertical 9:16. The same student listening and smiling at something the lecturer says (lecturer out of focus); no laptop open.	Slow push-in, natural reactions.
C 5 s	Vertical 9:16. After class, the student walks out holding the phone, glances at it (screen not visible) and smiles.	Tracking shot following them through the hallway.

VID-03 Use-case clip: The client call

P2

Where it goes	Theme editor › Home page › Video carousel › Video 2	Format	9:16 vertical · 1080 × 1920 · 15–20 s · MP4
On-screen captions	Snap it on. → Take the call. → Summary and action items, done.	Higgsfield model	Soul 2.0 start frames (+ Nano Banana Pro device fix) → Kling 3.0 image-to-video

SHOT	START FRAME	MOTION
A 4 s	Vertical 9:16 macro. A hand brings **[DEVICE]** to the back of a smartphone.	The device snaps onto the phone magnetically; slight camera shake on contact, then still.
B 6 s	Vertical 9:16. A young analyst walks outdoors near a glass office building, phone to ear, device visible on the back.	Tracking shot walking backward in front of them.
C 5 s	Vertical 9:16. Seated at a desk, they look at their phone (screen not visible) and nod, satisfied.	Static medium shot.

VID-04 Use-case clip: The team meeting

P2

Where it goes	Theme editor › Home page › Video carousel › Video 3	Format	9:16 vertical · 1080 × 1920 · 15–20 s · MP4
On-screen captions	Press. Talk. Done. → Minutes and to-dos for everyone.	Higgsfield model	Soul 2.0 start frames (+ Nano Banana Pro device fix) → Kling 3.0 image-to-video

SHOT	START FRAME	MOTION
A 4 s	Vertical 9:16 top-down. A phone with **[DEVICE]** is placed in the center of a meeting table; a hand presses the switch.	Static top-down camera.
B 6 s	Vertical 9:16. A small team discussing around the table in natural light.	Slow orbit around the table.
C 5 s	Vertical 9:16. The founder holds the phone and smiles, showing the screen to a colleague (screen facing away from camera).	Static medium shot.

Images

IMG-01 Hero product shot (desktop)

P1

Where it goes	Theme editor › Home page › Hero › Image	Format	Image · 16:10 · 2400 × 1500 px
File name	`alumnus-img-01-hero.jpg`	Higgsfield model	Nano Banana Pro with 2–3 reference photos of your real device

PROMPT

Premium website hero product photo, 16:10. A modern smartphone stands upright at a slight three-quarter angle on a seamless very light cool-grey surface, back of the phone facing the camera, with **[DEVICE]** snapped flat onto the center of the phone's back. Keep the device identical to the reference photos. Large soft window light from the left, smooth background gradient from white to pale blue-grey, delicate contact shadow, crisp detail on the grooves and the black top strip. Subject centered with wide empty space left and right. Minimal, calm, Apple-style product page. No text, no logos.

- Grooves straight and evenly spaced; top strip layout matches your unit
- No phone-brand logo visible
- Nothing important near the left/right edges (the theme crops to fit)

IMG-01M Hero product shot (mobile crop)

P1

Where it goes	Theme editor › Home page › Hero › Mobile image	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-01m-hero-mobile.jpg`	Higgsfield model	Nano Banana Pro (edit IMG-01, or regenerate with the same references)

PROMPT

Same scene as IMG-01, reframed vertically at 4:5. The phone and **[DEVICE]** fill the middle of the frame with extra clean space above and below. Same light, same background, same shadow. No text.

- Matches IMG-01 colors so desktop and mobile feel like one shoot

IMG-02 Brand film poster frame

P1

Where it goes	Theme editor › Home page › Intro film › Poster image	Format	Image · 16:9 · 1920 × 1080 px
File name	`alumnus-img-02-film-poster.jpg`	Higgsfield model	Soul 2.0 for the scene, then Nano Banana Pro edit with your device references to fix the device

PROMPT

Cinematic 16:9 still. A university student in a sunlit lecture hall, seated in the middle rows, looking up at the out-of-focus lecturer with a relaxed, attentive expression; no laptop open. On the desk in front of them a smartphone lies face-down with **[DEVICE]** attached to its back, the tiny white sound-wave light glowing. Warm morning light through tall windows, shallow depth of field focused on the device and the student's hand, soft film grain. No text.

- Also works as the first frame of shot 2 in VID-01

IMG-03 Wide statement image

P2

Where it goes	Theme editor › Home page › Image banner › Image (+ Mobile image = IMG-03M)	Format	Image · 21:9 (mobile 4:5) · 2400 × 1030 px (mobile 1200 × 1500)
File name	`alumnus-img-03-wide.jpg`	Higgsfield model	Soul 2.0 or Nano Banana Pro with device references

PROMPT

Wide cinematic 21:9 photo. A clean light-wood desk by a large window overlooking a leafy university campus in soft morning light. On the desk: an open notebook, a cup of coffee, a pen with an orange cap, and a smartphone lying face-down with **[DEVICE]** on its back, placed on the right third. Lots of calm negative space, airy, muted natural palette, shallow depth of field. No people, no text. Mobile version (IMG-03M): same scene, vertical 4:5, device in the lower middle.

- Keep the device large enough to read at phone size in the 4:5 version

IMG-04 Real-life card: In class

P2

Where it goes	Theme editor › Home page › Lifestyle gallery › Photo card 1	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-04-in-class.jpg`	Higgsfield model	Soul 2.0 (people) → Nano Banana Pro edit to insert the exact device

PROMPT

Vertical 4:5 lifestyle photo. A student in a bright lecture hall seen from the side at desk level, relaxed and attentive, listening instead of typing. A smartphone with **[DEVICE]** on its back lies on the desk in the foreground, slightly in focus. Soft daylight, candid, shallow depth of field. **[CAST]**. No logos, no text.

- Device clearly visible in the foreground

IMG-05 Real-life card: At work

P2

Where it goes	Theme editor › Home page › Lifestyle gallery › Photo card 2	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-05-at-work.jpg`	Higgsfield model	Soul 2.0 → Nano Banana Pro edit

PROMPT

Vertical 4:5 lifestyle photo. A young professional in a modern glass meeting room, mid-conversation with colleagues who are softly out of focus. A smartphone with **[DEVICE]** on its back lies on the table in the foreground. Bright, natural light, candid moment. **[CAST]**. No logos, no text.

- No laptop or wall screens showing readable text

IMG-06 Real-life card: On a call

P2

Where it goes	Theme editor › Home page › Lifestyle gallery › Photo card 3	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-06-on-a-call.jpg`	Higgsfield model	Soul 2.0 → Nano Banana Pro edit

PROMPT

Vertical 4:5 lifestyle photo. A person on a phone call in a bright café, phone held to their ear with **[DEVICE]** clearly attached to the back of the phone and facing the camera. Natural smile, soft window light, shallow depth of field. **[CAST]**. No logos, no text.

- The device faces the camera (the back of the phone is toward the lens)

IMG-07 Real-life card: On the go

P2

Where it goes	Theme editor › Home page › Lifestyle gallery › Photo card 4	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-07-on-the-go.jpg`	Higgsfield model	Soul 2.0 → Nano Banana Pro edit

PROMPT

Vertical 4:5 lifestyle photo. A student walking on a tree-lined campus path at golden hour, holding a phone near their chin and talking an idea through, **[DEVICE]** on the back of the phone. Warm low sun, gentle motion, candid. **[CAST]**. No logos, no text.

- Feels like the same world as IMG-04 to IMG-06 (same grade)

IMG-08 Macro hero of the device

P1

Where it goes	Theme editor › Home page › Feature grid › Large image	Format	Image · 16:9 · 2400 × 1350 px
File name	`alumnus-img-08-macro.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Studio macro product photo, 16:9. **[DEVICE]** floats at a slight angle above a seamless pale cool-grey background, front facing the camera. Soft large key light from the upper left plus a thin rim light that traces the vertical grooves and the edge, showing how thin it is. Extremely sharp detail, soft shadow below, generous empty space around it. Minimal and premium. No text.

- This is the image people zoom into: details must be right

VID-05 Looping turntable video (optional, replaces IMG-08)

P3

Where it goes	Theme editor › Home page › Feature grid › Or a looping video	Format	Video · 16:9 · 1920 × 1080, 6–8 s, MP4 under 10 MB
File name	`alumnus-vid-05-loop.mp4`	Higgsfield model	Kling 3.0 image-to-video, IMG-08 as both start and end frame

PROMPT

Slow 360-degree turntable rotation of the device in place, light glints across the vertical grooves, camera locked off, background unchanged, ends exactly where it started so the clip loops seamlessly.

- No morphing of the grooves during the turn
- Plays muted; no audio needed

IMG-09 Feature tile: One-press recording

P2

Where it goes	Theme editor › Home page › Feature grid › Feature 1 › Image	Format	Image · 4:3 · 1200 × 900 px
File name	`alumnus-img-09-one-press.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Macro photo, 4:3. A thumb presses the slide switch on the black top strip of **[DEVICE]**, which is attached to the back of a phone held in one hand. Very shallow depth of field, soft daylight, the tiny white sound-wave light glowing. No text.

- Confirm which control starts recording on your unit and describe that control in the prompt

IMG-10 Feature tile: Card-thin, magnetic

P2

Where it goes	Theme editor › Home page › Feature grid › Feature 2 › Image	Format	Image · 4:3 · 1200 × 900 px
File name	`alumnus-img-10-card-thin.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Product photo, 4:3. **[DEVICE]** lies flat next to a plain blank card the size of a credit card (no logos, no numbers) on a pale grey surface. Camera almost at table height so the thin edge is visible. Soft side light, crisp edges, minimal. No text.

- Thickness looks right next to the card (about 3 mm; confirm your real spec)

IMG-11 Feature tile: Records calls

P2

Where it goes	Theme editor › Home page › Feature grid › Feature 3 › Image	Format	Image · 4:3 · 1200 × 900 px
File name	`alumnus-img-11-calls.jpg`	Higgsfield model	Soul 2.0 → Nano Banana Pro edit

PROMPT

Lifestyle photo, 4:3. Close view of a person holding a smartphone to their ear in a bright modern office, **[DEVICE]** clearly attached to the back of the phone facing the camera. Face partly out of frame and softly out of focus, natural light. No text.

- Device sharp, person soft

IMG-12 Feature tile: All-day battery

P2

Where it goes	Theme editor › Home page › Feature grid › Feature 4 › Image	Format	Image · 4:3 · 1200 × 900 px
File name	`alumnus-img-12-charging.jpg`	Higgsfield model	Nano Banana Pro with device references + a photo of your real cable

PROMPT

Product photo, 4:3. **[DEVICE]** on a light wood desk with its magnetic charging cable attached; the cable curves gracefully out of frame. Soft morning light, minimal props. Match the cable and connector to the reference photo exactly. No text.

- Connector position matches your real device

IMG-13 App showcase: phone with the summary screen

P1

Where it goes	Theme editor › Home page › App showcase › Image	Format	Image · 1:1 · 1600 × 1600 px
File name	`alumnus-img-13-app.jpg`	Higgsfield model	Nano Banana Pro (scene) + composite your real screenshot APP-01 onto the screen

PROMPT

Square product photo, 1:1, on a dark charcoal surface. A smartphone stands at a slight angle with its screen facing the camera; the screen is plain pure white. **[DEVICE]** lies flat beside it at a slight angle. Soft top light, subtle warm orange rim light, premium tech mood. Leave the screen pure white for compositing. No text. Then: "Place this screenshot onto the phone screen with matching perspective and glass reflection; keep everything else identical."

- The screen must show your real app (APP-01), never an AI-invented interface

IMG-17 Export visual: one recording, many formats

P3

Where it goes	Theme editor › Home page › Export formats › Image	Format	Image · 16:9 · 2400 × 1350 px
File name	`alumnus-img-17-export.jpg`	Higgsfield model	Nano Banana Pro or Kling Image 3.0 (clean 3D render)

PROMPT

Clean 3D render, 16:9. **[DEVICE]** floats in the center of a soft white-to-pale-grey space with a faint glowing sound wave above it. Around it, five translucent frosted-glass cards float outward in a gentle arc, each showing only a simple icon: a document, a word-processor page, an envelope, an audio waveform, a download arrow. Subtle orange accent light, soft shadows, airy and minimal. No letters or words anywhere.

- No fake file names or text on the cards

IMG-18 Product gallery 1: front packshot (main image) P1

Where it goes	Shopify admin › Products › Alumnus AI Recorder › Media (first image)	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-18-front.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Studio packshot, 1:1. **[DEVICE]** stands upright facing the camera straight on, perfectly centered, filling about 65% of the frame. Seamless light-grey background (#F4F4F6), large soft light from above-left, soft shadow, ultra sharp. No props, no text.

- This image feeds Google Shopping, the Shop app and Meta catalogs: product only, no text or badges

IMG-19 Product gallery 2: back / magnetic side P2

Where it goes	Shopify admin › Products › Media	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-19-back.jpg`	Higgsfield model	Nano Banana Pro with a real photo of the back as reference

PROMPT

Studio packshot, 1:1, same setup as IMG-18. The back of the device, showing its flat magnetic back exactly as in the reference photo of the back. No text.

- Only generate this if you have a real photo of the back; otherwise photograph it

IMG-20 Product gallery 3: on a phone P1

Where it goes	Shopify admin › Products › Media	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-20-on-phone.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Studio photo, 1:1, same setup as IMG-18. Three-quarter view of the back of a modern smartphone with **[DEVICE]** attached in the center. No phone-brand logo. No text.

- Phone looks generic (no Apple/Samsung logo)

IMG-21 Product gallery 4: edge-on (thinness)

P2

Where it goes	Shopify admin › Products › Media	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-21-edge.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Studio photo, 1:1, same setup as IMG-18. **[DEVICE]** seen exactly edge-on, standing on its long side, very low camera angle, showing the slim profile. No text.

- Proportions match the real thickness

IMG-22 Product gallery 5: in hand for scale

P2

Where it goes	Shopify admin › Products › Media	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-22-in-hand.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Studio photo, 1:1, light-grey background. A hand holds **[DEVICE]** between thumb and fingers, front facing the camera, to show its size. Natural skin, short clean nails. No text.

- Five fingers, natural grip, device not oversized

IMG-23 Product gallery 6: what's in the box

P2

Where it goes	Shopify admin › Products › Media	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-23-in-the-box.jpg`	Higgsfield model	Nano Banana Pro with photos of every real item

PROMPT

Top-down flat lay, 1:1, on light grey. **[DEVICE]**, its magnetic charging cable coiled neatly, and a small blank quick-start card, evenly spaced and aligned. Soft even light. No text.

- Show only what you actually ship

IMG-24 Second color packshot (variant image)

P2

Where it goes	Shopify admin › Products › Media, then assign it to the second color variant	Format	Image · 1:1 · 2048 × 2048 px
File name	`alumnus-img-24-color-2.jpg`	Higgsfield model	Nano Banana Pro with a real photo of that color

PROMPT

Same as IMG-18, but the device is in [your second color], matching the reference photo of that color exactly.

- Only list colors you can actually ship

VID-06 Product 360° spin (product media video)

P3

Where it goes	Shopify admin › Products › Media (video)	Format	Video · 1:1 · 1080 × 1080, 8 s loop, MP4
File name	`alumnus-vid-06-spin.mp4`	Higgsfield model	Kling 3.0 image-to-video, IMG-18 as start and end frame

PROMPT

Slow 360-degree turntable rotation of the device, camera locked off, studio light constant, background unchanged, seamless loop.

- Plays muted in the product gallery

IMG-25 FAQ image

P3

Where it goes	Theme editor › Home page › FAQ › Image	Format	Image · 4:5 · 1200 × 1500 px
File name	`alumnus-img-25-faq.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Vertical 4:5 photo, top-down at about 30 degrees. An open notebook with handwritten notes, a smartphone lying face-down on it with **[DEVICE]** on its back, a pen with an orange cap, soft daylight from a window, calm and tidy. The handwriting is blurred and unreadable. No text.

- No readable words in the notebook

IMG-26 Closing offer background

P2

Where it goes	Theme editor › Home page › Closing offer › Background image	Format	Image · 16:9 · 2400 × 1350 px
File name	`alumnus-img-26-closing.jpg`	Higgsfield model	Soul 2.0 or Nano Banana Pro with device references

PROMPT

Wide 16:9 evening desk scene. Warm desk lamp and cool laptop glow, a smartphone with **[DEVICE]** on its back on the right third of the desk next to a notebook. The left 45% of the frame is dark, calm and empty for text. Cinematic, moody but clean. No text, no readable screen.

- Left side dark enough for white text

IMG-27 Discount popup image

P1

Where it goes	Theme editor › Discount popup (listed with the page sections) › Image	Format	Image · 4:5 · 1000 × 1250 px
File name	`alumnus-img-27-popup.jpg`	Higgsfield model	Nano Banana Pro with device references

PROMPT

Vertical 4:5 bright product photo. A phone with **[DEVICE]** on its back lies on a pale surface beside a small white gift box tied with an orange ribbon. Clean, cheerful, soft daylight, lots of white space. No text.

- Reads clearly at small size

IMG-28 Social share image

P1

Where it goes	Theme editor › Theme settings › Favicon and sharing › Social share image	Format	Image · 1.91:1 · 1200 × 630 px
File name	`alumnus-img-28-share.jpg`	Higgsfield model	Nano Banana Pro with device references, then add your logo and headline in Canva

PROMPT

Wide product photo, 1.91:1. A phone with **[DEVICE]** on its back stands at a three-quarter angle on the right side of a white-to-pale-grey seamless background; the left half is empty for a logo and headline added later. No text.

- This is what people see when your link is shared on iMessage, TikTok DMs and X

Assets that must be real (no Higgsfield)

ID	WHAT	HOW TO GET IT
APP-01–03	App screenshots: summary, mind map, to-do list	Record a 5-minute sample (read an article aloud), let the app generate each view, screenshot on a clean phone, crop to 4:3. These also go on the phone screen in IMG-13 and shot 6 of VID-01.
LOGO-01–05	Logo bar	Only schools, companies or press where it's true. Until then, hide the section or switch it to "As seen in" when you get press.
Reviews	Review cards and Reviews section	Real reviews only. A reviews app sends requests after delivery and imports photos and videos.
UGC videos	Replace VID-02–04 over time	Seed devices to student creators through Shopify Collabs; use their clips with permission, real names and roles, and remove the "Demo footage" note.

Bonus: three ad concepts for TikTok and Reels

These aren't for the website. TikTok requires an AI label on ads with realistic AI people, voices or scenes [15]. Best practice: AI for b-roll and product shots, real creators for faces.

AD-01 "I stopped taking notes in class"

Ads

Creator-style talking head (Higgsfield UGC Factory or Marketing Studio, UGC preset, 9:16). Hook in the first 2 seconds, then the device, then a real screen recording of the summary.

PROMPT

Vertical 9:16, handheld selfie framing in a dorm room. A student talks to camera: "I stopped taking notes in lectures. Here's why." Cut to them pressing **[DEVICE]** on the back of their phone. Natural vlog pacing, casual and honest.

AD-02 "Why not just use your phone?"

Ads

Split-screen comparison, 9:16. Mirrors the comparison table on the site.

PROMPT

Vertical 9:16 split screen. Left: a stressed student typing fast on a laptop and missing what the lecturer says. Right: a relaxed student listening, phone with **[DEVICE]** on the desk. Same lecture hall, same light.

AD-03 The snap (product ASMR)

Ads

Product-only macro loop, no people. Add a real recorded snap sound.

PROMPT

Vertical 9:16 macro. **[DEVICE]** snaps onto the back of a phone in slow motion, the white sound-wave light turns on, then a slow orbit shows the thin edge. Clean studio light, pale grey background.

PART 5

Launch checklist

Every [bracket] in the theme, plus the settings that make the offers work.

Facts to confirm with your supplier

- [ ] Thickness [3] mm and weight [X] g
- [ ] Battery [X] hrs recording, [X] days standby
- [ ] Storage [X] GB
- [ ] Languages [X]
- [ ] iPhone and Android support; MagSafe or included magnetic ring
- [ ] What's in the box
- [ ] Free app limits ([X] minutes) and whether a Pro plan exists ([$X]/mo)
- [ ] Encryption, storage location, AI training use
- [ ] Export formats ([More: confirm])
- [ ] Which control starts recording (for IMG-09)

Your business decisions

- [ ] Sale % in the announcement bar, popup, teaser and closing offer ([X]%)
- [ ] Sale end date (Theme settings › Product and offer)
- [ ] Bundle tier percentages (Buy box) = your automatic discounts
- [ ] Welcome code (popup) created in Discounts
- [ ] Return window [30] days and warranty [1] year (announcement, hero, buy box, guarantee, FAQ, closing offer)
- [ ] Shipping time [X–X] business days (buy box, guarantee, FAQ)
- [ ] Countries you ship to (FAQ)
- [ ] Student discount: yes or no (FAQ)
- [ ] Teams plan: contact page or remove
- [ ] Cart add-on product (Theme settings › Cart)

Social proof (real only)

- [ ] Hero, buy box and reviews rating [X.X] and count [X] (automatic once a reviews app is installed)
- [ ] "[X]+ students, interns and founders" and "[X]+ happy customers": real numbers or rewrite the headings
- [ ] Review cards and review blocks: real reviews or remove
- [ ] Logo bar: real logos or hide

Before you publish

- [ ] Archive the old streetwear products
- [ ] Upload P1 assets; turn off "Show placeholder labels" if any slot is still empty
- [ ] Footer: TikTok and Instagram links (replace "yourhandle"), App Store / Google Play links or hide badges
- [ ] Policies: refund, shipping, privacy, terms
- [ ] Place a test order with each bundle tier and the welcome code
- [ ] Check the site on your phone: popup, sticky bar, cart drawer
- [ ] Install reviews app and sales channel pixels (TikTok, Meta, Google)
